- 25 Jostens Grad and Ring Order Make-up Day During Lunch
- 30 PSAT Testing 7:30 am in Lecture Hall

Student Input

Recently, we shared a survey with our students that we asked them to complete. This survey asked questions related to the ideas of respect, upholding expectations, and getting involved or feeling connected at MHS.

Student input is very important to us and we will be using the results of this survey to help improve our school environment. In addition to this survey, we are continuing to teach and reinforce our school-wide behavior expectations. Our students are doing well and we will continue to work to teach and reinforce these behavior expectations.

Principal's Message

It is hard to believe that the 1st quarter of school is coming to an end soon. I have

enjoyed **getting to know our students** and I have been pleased with how well our students are participating in classroom activities and the behaviors that they are demonstrating.

This school year we have been talking with our students about different **career options** for after high school. Many of these careers do not require a 4 year college degree. There are a number of options for students in the manufacturing, construction, health and sciences, and technology fields..

We have been highlighting some of these career options through videos that we are showing to students during academic period. We want to make sure we are educating ALL students on what college and career choices are available. Going to college is a great choice, but it does not work for every student. Data actually shows that a good amount of our students should be considering all options while they are discussing their future plans.

We will continue to provide information and opportunities to our students to help them identify their interests and understand some possible career choices that might be available to them after graduation..

Student Drop-Off

Please continue to help keep the traffic moving in the morning in the **student drop-off area**. We have three entrances for students to enter the building. When you stop along the curb, have your student hop out of the car and enter the building using one of these entrances. Please continue to help us to make this area safe and efficient. Thanks!
